Overview

Working with ArrayLists

- An ordered list of objects

Working with Lambda Predicates

Working with Strings and StringBuffers

Working with Dates and Times

- LocalDate, LocalTime, LocalDateTime, ZonedDateTime.

Working with ArrayList

Creating ArrayLists

Adding and Removing Elements

Inspecting and Traversing ArrayLists

Autoboxing with ArrayLists

Overview

An ordered list of objects

Create ArrayLists with generic operators

Add, remove, set objects in an ArrayList

Size, contains, and equals

Loop through an ArrayList
- for(String color : aList_1){}
- ListIterator iterator = aList_1.listIterator();
- forEach(*lambda expression*)
